Education

Indian Institute of Information Technology, Jabalpur

December 2021 – July 2025

Bachelor of Technology in Computer Science and Engineering

Jabalpur, India

Experience

Sparrow Interactive

Feb 2026 – Present

Full Stack Developer - AI Engineer | Python, Next.js, Tailwind CSS, SQL

Noida

- Built a sales-focused RAG chatbot using FastAPI, Sarvam AI, Qdrant, and Sentence-Transformers for context-aware Q&A over PDFs and web content, paired with an embeddable widget and a React/Vite admin dashboard delivering real-time analytics, lead capture, and automated email outreach.
- Crafted the Sparrowi website using Next.js 16, React 19, and Tailwind, with 3D visuals via Three.js and Spline.
- Currently working on the AI Experience Center, a 6-microservice kiosk integrating face recognition (InsightFace), LLM tool-calling (Ollama), and emotion analytics (MediaPipe).

SWAFINIX TECHNOLOGIES

Nov 2025 – Feb 2026

AI Intern | Python, JavaScript, React, Node.js, MongoDB

Remote

- Delivered an agentic RAG-based agentic chatbot, boosting information retrieval accuracy and elevating user interaction across the platform.
- Implemented features for client-based web applications using JavaScript and REST APIs delivering reliable, production ready full stack solutions.

Zexa Technologies

July 2025 – Oct 2025

Software Development Intern | React, Node.js, PostgreSQL

Remote(Jaipur)

- Contributed to the ZexaNext Next.js boilerplate by implementing reusable modules using Next.js, TypeScript, PostgreSQL, Prisma and Auth.js, with a focus on scalability and maintainable architecture.
- Delivered customer-facing MVPs and product websites using Next.js and JavaScript, integrating APIs and optimizing UI performance to ensure production ready applications.

Projects

RealDocs | *Next.js, TypeScript, Lexical Editor, Liveblocks* ([Live](#))

May 2024

- Built LiveDocs, a Google Docs, leveraging Next.js and TypeScript to develop a responsive, real-time collaborative text editor powered by Liveblocks.
- Integrated Lexical Editor for rich text editing and incorporated ShadCN to enhance the user experience, demonstrating expertise in building scalable, real-time web applications.

Hostel Hub Base | *MongoDB, Express.js, React, Node.js* ([Live](#))

Aug 2023

- Created a hostel management system as a microservice, supporting four key roles and achieving an 85% active user rate across key modules.
- Implemented one-click and manual options for hostel and room assignments, allowing admins and caretakers to efficiently manage allocations.

AirCargoPro | *React, Node.js, Express, MongoDB, Redis, Tailwind CSS* ([Github](#))

March 2022

- Developed a scalable cargo booking platform using React 19, Node.js, and MongoDB, featuring secure JWT authentication and a modern, responsive UI built with Tailwind CSS.
- Engineered a custom Depth-Limited Search algorithm to calculate optimal direct and 1-stop flight routes, integrated with Redis caching to reduce database load and deliver instant search results.
- Implemented extensive RESTful APIs for real-time shipment tracking and booking management, utilizing React Query for efficient server-state synchronization and optimistic UI updates.

Technical Skills

Languages: C++, Python, Java, JavaScript, TypeScript, SQL

Frameworks: React, Node.js, Express.js, Next.js

Database: SQL, MongoDB, PostgreSQL

Tools: Git, GitHub, VS Code, GCP, AWS(Lightsail & EC2), Docker, Qdrant, n8n

Certifications and Achievements

- Solved 600+ problems on platforms including LeetCode, Codeforces, CodeChef, and GeeksforGeeks.
- Participated in 10+ hackathons such as HackByte at IIIT Jabalpur, developing AI Helper, which was selected among the Top 5 finalists.
- Certification of Swafinix Technologies AI Intern – [Link](#)
